

Popular Design for CRM-PS/PSE08 CRM-PS Series Motor to Burundi Manufacturers

CRM-PS series' LSHT radial cam-ring hydraulic motors are widely applied in deck, construction, mining machinery, cement equipments, heavy metallurgy, military industry, and can be directly used in hydrostatic transmission units.

- 1、 The modular design of the product, output module, function module, flow-distribution module and brake module, enables customers to select according to their actual requirements, thus to reduce their mechanical configuration to make the whole layout flexible and simple.
- 2、 The output module of products applies biconical roller bearing to withstand stronger radial and axial force.
- 3、 The disc flow-distribution module features with automatic wear- compensation function, which keeps high volumetric efficiency of motors in long term.
- 4、 The Function module applies sliding shoe which features with high load, anti-friction and heat-resistance performance, to reduce mechanical friction loss, optimizes stator curves' design, thus to improve the running stability and impact-resistance of the motor.
- 5、 The application of new composite processing technology enhances fatigue, abrasive and correction resistance of the parts, thus to prolong the service life of the motor. Customers select according to their actual requirements, thus to reduce their mechanical configuration to make the whole layout flexible and simple.
